EARTH IS SPINNING FASTER THAN IT HAS IN THE PAST 50 YEARS

2021 IS SET TO FLY BY!

THE TIMELINE

Since the 1960s, the atomic clocks have been keeping ultra-precise records of the day's length and found that for the past 50 years, the Earth has taken a fraction less than 24 hours (86,400 seconds) to complete one rotation. However, in the middle of 2020, this long-standing trend was reversed, and days are now regularly shorter than 86,400 seconds

On July 19, 2020, the day was 1.4602 milliseconds shorter than the full 24 hours – the shortest day since the records began

Prior to 2020, the shortest day occurred in 2005, but this record has been shattered a staggering 28 times in the last 12 months

On an average, the days are now passing 0.5 seconds shy of 24 full hours

The next possible date for a leap second is June 30, 2021, as leap seconds are always added on the last day of June or Dec

WHY IT IS SIGNIFICANT

Though this diminutive loss of time is only detectable at the atomic level, it has wide-reaching implications, say experts. Satellites and communications equipment rely on the true time aligning with the solar time, which is determined by the positions of the stars, Moon and the sun

In fact, some of the web's most-popular sites were laid low on July 1, 2012, after the world's timekeepers added an extra second to the day. Sites including Reddit, FourSquare, Yelp, LinkedIn, Gawker and StumbleUpon crashed, after the extra second played havoc with their servers and source code

The world timekeepers are debating whether to delete a second from time – called a negative leap second – to account for the change, and bring the time passage back into line with the rotation of the Earth

Yes, you heard it right. The Earth is speeding up, prompting suggestions to shorten the minute by a second.

2021 is slated to be about 19 milliseconds short of a typical year, with an average daily deficit of 0.5 milliseconds

- According to data shared by TimeAndDate.com, the 24-hour daily rotation is decreasing incrementally, making the day marginally shorter
- Though the planet's rotation rate speed up or slow down slightly day to day due to the natural terrestrial and celestial alterations, astronomical calendar trends indicate that recent years have become shorter, overall
- According to experts, while the addition of a so-called 'negative leap second' has never been done before, a total of 27 'leap seconds' have been added since the 1970s, in order to keep the atomic time in line with the solar time. This is because, for decades, the Earth has taken slightly longer than 24 hours to complete a rotation. However, since last year, it has been taking slightly less time to complete a rotation

KANGANA RANAUT SHARES HER LIFE MANTRA

Actress Kangana Ranaut recently shared her life mantra—never compromise on your health, stay away from unhealthy habits and pessimistic people—with a motivational workout video, where she is seen doing pilates on Twitter.

CELEB MANTRA

"Early morning fitness routine— Remember one thing in life, 'jo fit hai woh hit hai', never compromise on your health, stay away from unhealthy habits and pessimistic people. Stay in the company of great beings, if you don't find them physically, find their books or teachings," she wrote along with the video

BUZZ

A RINGTONE MADE FROM DATA ON MARS' WEATHER PATTERNS

Out-of-this-world' ringtones, made through a musical interpretation of the weather patterns found on Mars, was released by NASA recently. According to a Daily Mail report, researchers used the Pleiades supercomputer at the space agency's Ames Research Centre in California to turn predicted Martian cloud movements into sound. Once this 'data sonification' process was complete, flautists and musicologists brought the piece to life.

From the rendition, snippets were sampled to produce ringtones, which can be downloaded from the NASA website.

Researchers used an imaging tracking system to study the movement of cloud formations predicted by the supercomputer, from which patterns were filtered out and mapped onto musical intervals, producing a piece for playing

Pleiades – one of the most-powerful supercomputers in the world – is used by NASA to forecast the weather on Mars. Mars has the largest dust storms in the entire solar system, which can last for several months and cover the entire planet

13-YEAR-OLD SETS RECORD PLAYING KEYBOARD WITH A BLINDFOLD

13-year-old boy has set a new record by playing 20 songs in 30 minutes on a keyboard with a blindfold. AS Hariharan Naidu achieved the feat to enter the 'Wonder Book of Records'. A student of class VIII at the Gitanjali Devshala in Hyderabad, Naidu recently set the record by staging the performance in the presence of judges from the Wonder Book of Records (WBR). "He played 20 songs in 30 minutes and that too with a blindfold. It's a record. In fact, he completed this in 29 minutes, 19 seconds," said G. Swarna Sree, South India Chief Coordinator, Wonder Book of Records.

Hariharan has started a YouTube channel 'Chill with Hariharan'. He has posted several videos of his performances, including a couple of songs as a tribute to actor Sushant Singh Rajput. The YouTube channel has already garnered over 3,000 subscribers

PM-HEADED MEET SETS JAN 16 FOR VACCINATION LAUNCH

India will launch its vaccination drive against Covid-19 on January 16 after the forthcoming festivals of Lohri, Makar Sankranti, Pongal and Magh Bihu, at a time when India's infections are low as compared to several nations witnessing fresh spikes. The decision on the roll-out date was taken at a high-level meeting, chaired by PM Modi on Saturday to review the status of Covid-19 in the country and the preparedness of the states and UTs for the vaccination programme, which in its first phase targets 30 crore people.

V-DAY

Initially, around three crore health-care and frontline workers will be inoculated, followed by those above 50 years of age and the under-50 population with co-morbidities, estimated at around 27 crore

The vaccination programme might also be ramped up, depending on the status of the infection spread and supply of vaccine

QUEEN ELIZABETH AND PRINCE PHILIP GIVEN COVID-19 VACCINE

Britain's Queen Elizabeth II and her husband Prince Philip received Covid-19 vaccinations on Saturday, Buckingham Palace said, in a rare public comment on the private health matters of the long-serving monarch. "The Queen and the Duke of Edinburgh have received Covid-19 vaccinations," a Buckingham Palace spokesman said. According to sources, the queen, 94, and Philip, 99, were given the injections by a royal household doctor at the Windsor Castle. No further details about the vaccinations were released.

More than 1.5 million people in Britain have so far received virus jabs, as the biggest immunisation programme in its history ramps up, with priority given to the elderly, their helps and health workers

FACTOID

\$210 BILLION

The amount of loss the world had to bear in 2020, courtesy, being the second-warmest year on record, claimed a report by Munich Re. The second-warmest year on record brought storms, fires and floods that killed at least 8,200 people, the report added.

- SIX OF THE MOST-EXPENSIVE DISASTERS HAPPENED IN THE US, INCLUDING A DESTRUCTIVE DERECHO IN THE MIDWEST, A RECORD NUMBER OF TROPICAL STORMS AND HURRICANES STRIKES, AND AN ALL-TIME HIGH ACREAGE BURN IN CALIFORNIA
- THE US DAMAGES TOTALLED AT LEAST \$95 BN, WITH \$67 BN OF THAT IN INSURED LOSSES, SAID MUNICH – THE YEAR'S SINGLE-WORST DISASTER WAS FLOODING ACROSS CHINA DURING ITS MONSOON, WHICH AMOUNTED TO \$17 BILLION, OF WHICH ONLY ABOUT 2% WAS INSURED
- GLOBALLY, 60% OF 2020'S LOSSES WEREN'T INSURED. THE GROWING ASIAN ECONOMIES SAW THE LEAST NUMBER OF INSURED LOSSES

At \$188.5bn, Musk beats Bezos as WORLD'S RICHEST

RICHIE RICH

Elon Musk, the outspoken entrepreneur behind the Tesla Inc and SpaceX, is now the richest person on the planet. A 4.8% rally in the electric carmaker's share price recently, boosted Musk past Amazon.com Inc founder Jeff Bezos on the Bloomberg Billionaires Index, a ranking of the world's 500 wealthiest people.

- The South Africa-born engineer's net worth was \$188.5 billion, \$1.5 billion more than Bezos (at the time of reporting). Musk, who has held the top spot since October 2017, is also a rival to Bezos, owner of the Blue Origin LLC in the private space race
- The milestone caps an extraordinary 12 months for Musk. Over the past year, his net worth soared by more than \$150 billion in possibly the fastest bout of wealth creation in history. Fuelling his rise was an unprecedented rally in Tesla's share price, which surged 743% last year on the back of consistent profits

The world's 500 richest people added a record \$1.8 tn to their combined net worth last year, equivalent to a 31% increase. The gains were disproportionately at the top, where five individuals hold fortunes in excess of \$100 bn

ACTOR NOMA DUMEZWENI JOINS DISNEY'S 'THE LITTLE MERMAID'

ENTERTAINMENT

The Undoing' breakout Noma Dumezweni has come aboard Disney's live-action remake of 'The Little Mermaid'. The film, to be directed by Rob Marshall, will feature singer-actor Halle Bailey as Ariel and Melissa McCarthy as her evil aunt, Ursula. The cast also includes Oscar winner Javier Bardem as King Triton, while British actor Jonah Hauer-King will take on the role of Prince Eric.

The original film, which released in 1989, narrated the story of Ariel, a teenage mermaid, who dreams of living on the surface world and marrying Prince Eric. Her fortunes change when a sea witch named Ursula offers to send Ariel to the human world in exchange for her beautiful voice

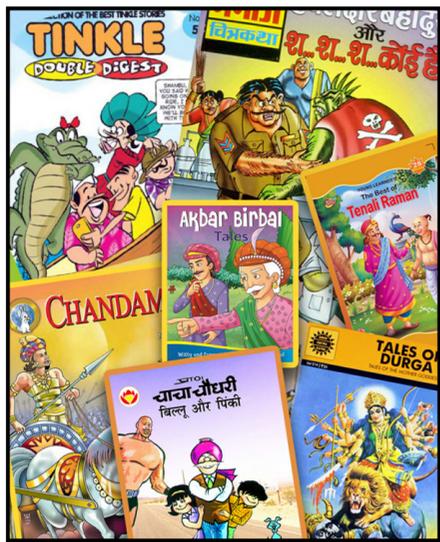

7 CLASSIC

Indian comic BOOKS

from our childhood

Remember those childhood days when life was nothing more than running around with friends, being fed by our parents' hands and reading end number of comic books? Undoubtedly, that was the best phase of our lives. Also, reading comic books used to be the most enjoyable as they acted as the gateway to new lands and universes (with superheroes and more) for us. Comic books give us the space to imagine and dream beyond the normal and the usual. Here is a look at 7 classic Indian comic books.

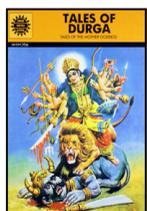

TINKLE

There would be few people in India, who would not have read Tinkle while growing up. A fortnightly magazine first issued in 1980, it's one of the most popular Indian comic books. The various characters like Suppandi, Shikari Shambhu are memorable.

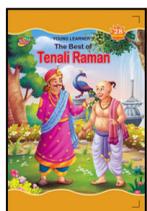

CHACHA CHAUDHURY

An absolute favourite of many of us, the short, red-turbaned Chacha Chaudhary along with Chachi, Rocket (dog) and Sabu, his tall assistant from Jupiter were a great fun combination. In the comic, Chacha's mind worked faster than the computer!

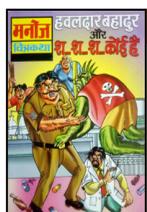

AMAR CHITRA KATHA

Aimed to teach children about Indian culture and social heritage, the format and style of the comics made children fall in love with them. Today, it is available in 20 languages in India and enjoys a steady readership with millions of copies sold.

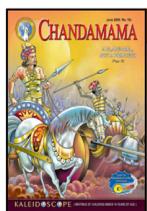

TENALI RAMA

Loved by the kids for his remarkable wit and wisdom - Tenali Raman was a famous scholar during the regime of the Vijayanagara Empire in the 16th century. He had a solution to every complicated problem that emerged in Krishnadevaraya's kingdom.

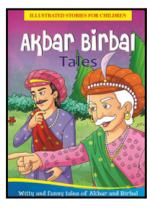

BAHADUR

'Bahadur (The Brave One)' is the first Indian comic book Super Hero created by Aabid Surti in the year 1976. Incidentally, Bahadur appeared on the scene when dacoit menace was at its worst in north India. Thus, the comic series focused a lot on dacoits.

CHANDAMAMA

Famous for its illustrations, Chandamama published long-running mythological and magical stories that ran for years. Its unique story-telling format taught moral values without being too preachy.

AKBAR BIRBAL

Akbar-Birbal was humorous and full of knowledge at the same time. Birbal's ability to outwit the other ministers in the court of Akbar made us laugh out loud.

FOCUS YOUR ATTENTION

Attention is one of the major components of memory. In order for information to move from your short-term memory into your long-term memory, you need to actively attend to this information. Try to study in a place free of distractions such as television, music, and other diversions. Getting rid of distractions might be a challenge, especially if you are surrounded by boisterous roommates or noisy children.

UTILISE MNEMONIC DEVICES

Mnemonic devices are a technique often used by students to aid in recall. A mnemonic is simply a way to remember information.

For example, you might associate a term you need to remember with a common item that you are very familiar with. The best mnemonics are those that utilise positive imagery, humour or novelty.

READ OUT LOUD

Research published in 2017 suggests that reading material out loud significantly improves your memory. Educators and psychologists have also discovered that having students actually teach new concepts to others enhances understanding and recall.

VARY YOUR STUDY ROUTINE

Another great way to increase your recall is to occasionally change your study routine. If you're accustomed to studying in one specific location, try moving to a different spot during your next study session. If you study in the evening, try spending a few minutes each morning reviewing the information you studied the previous night.

METHODS FOR IMPROVING YOUR MEMORY

AVOID CRAMMING

Studying materials over a number of sessions gives you the time you need to adequately process information. Research has continuously shown that students who study regularly remember the material far better than those who do all of their studying in one marathon session.

STRUCTURE AND ORGANISE

Researchers have found that information is organised in memory in related clusters. You can take advantage of this by structuring and organising the materials you're studying. Try grouping similar concepts and terms together, or make an outline of your notes and textbook readings to help group related concepts.

VISUALISE CONCEPTS

Many people benefit greatly from visualising the information they study. Pay attention to the photographs, charts, and other graphics in your textbooks. If you don't have visual cues to help, try creating your own. Draw charts or figures in the margins of your notes or use highlighters or pens in different colours to group-related ideas in your written study materials.

ELABORATE AND REHEARSE

In order to recall information, you need to encode what you are studying into long-term memory. One of the most effective encoding techniques is known as elaborative rehearsal. An example of this technique would be to read the definition of a key term, study the definition of that term, and then read a more detailed description of what that term means. After repeating this process a few times, you will probably notice that recalling the information is much easier.

RELATE NEW INFORMATION TO THINGS YOU ALREADY KNOW

When you're studying unfamiliar material, take the time to think about how this information relates to what you already know. By establishing relationships between new ideas and previously existing memories, you can dramatically increase the likelihood of recalling the recently learned information.

5 STYLE HACKS NO ONE TOLD YOU ABOUT

Haven't we all had fashion fails? A cloth fading, getting stained but that's not a reason to get disheartened. Here are five smart clothing hacks no one told you about but you wish you'd know! Read on and don't fret the next time you're in a fashion emergency. You can thank us later

Remove make-up marks from clothes

1 While wearing or changing your clothes, you can easily stain your clothes with your make-up. For this situation, you can obviously use make-up remover to get rid of the make-up smudges. But for tougher foundation and lip colours, you can use a shaving cream. Spray a little bit of it on the spot and let it stay for 5-10 minutes. This way the stain will dissolve easily and you can wash it off with cold water.

Don't let your denim fade

2 No one likes it when their favourite jeans or luxe denim jacket fades. To avoid

this, wash your denim pieces inside-out in cold water. And, just in case you want to fade your denim pieces, just wash them in hot water.

How to clean suede

3 When it comes to suede, cleaning this tricky fabric is not that easy. To clean off

the stains to get rid of them. You can also use a nail filer or an eraser to do the same.

Remove oil stains

4 Don't you just hate big oily stains on your favourite clothes? Just put some baby powder on the stain and let it stay overnight. Now, check in the morning if the stain is still there. If it is, repeat the process until it goes off.

Don't have an iron available?

5 If you have a fashion emergency and need to fix your wrinkled clothes, you can use a blow dryer. Sprinkle some water on your clothes and use a blow dryer to get rid of the creases.

QUIZ TIME (INDIA)

SHREYA RAVI, class IX, The Brigade School, Maleswaram, B'luuru

Q.1) To which kingdom did the Mughal ruler Babur belong?

- A. Ferghana
B. Samarkand
C. Persia
D. East Asia

Q.2) Who were the first traders to land in India?

- A. Portuguese
B. Dutch
C. English
D. Italians

Q.3) To which dynasty did the Vijayanagar ruler Krishnadevaraya belong?

- A. Tuluva
B. Sangama
C. Saluva
D. Atharva

Q.4) Which Mughal ruler was also known as the Zinda Pir because of his simplicity?

- A. Shah Jahan
B. Aurangzeb
C. Jahangir
D. Akbar

Q.5) Who was the first explorer to reach Indian shores?

- A. Christopher Columbus
B. Amerigo Vespucci
C. Ferdinand Magellan
D. Vasco da Gama

Q.6) Who finished building the Qutub Minar?

- A. Iltutmish
B. Qutb-ud-din-Aibak
C. Raziya Sultan
D. Ala-ud-din-Khijji

ANSWERS

1. A) Ferghana 2. B) Dutch 3. A) Tuluva 4. B) Aurangzeb 5. D) Vasco da Gama 6. A) Iltutmish

KNOWLEDGE BANK (MUSIC)

Mandolin

A small stringed instrument related to the lute (plucked string instrument with

a neck), it evolved in Italy in the 17th century. It has a pear shaped body with four pairs of steel strings played with a plectrum. It usually has four doubled metal strings (8 strings), although five (10 strings) and six (12 strings) versions also exist. There are many kinds - the round-backed mandolin, the carved-top mandolin and the flat-backed mandolin.

THE EDUCATIONIST

BEING A TEACHER TODAY!

Amrita Pandey is a teacher of Apeejay School Nerul, teaching for the past seven years. She shared her views on her overall teaching experience; from the beginning to the present

Q: What was it that inspired you to take up this job?

What inspired me was the kind of people I deal with in my job. I love being with children and moulding and chiselling them for the challenges of tomorrow.

Q: What has been the biggest lesson you learnt during your whole life as a teacher and mentor?

As a teacher and mentor one needs to upgrade; accept the changes. A teacher needs to be selfless and egoless. You become a mother to the child which is divine.

Q: How do you think the current Covid situation has affected you as well as your teaching?

It has deeply impacted all of us. Our pedagogy changed tremendously. No blackboard, no classrooms; only a computer and few slides. It was indeed very difficult in the beginning. There were times when I felt redundant, incompetent but in the end as I always believe

Amrita Pandey, Teacher

one can only grow in life if one is ready to upgrade, accept the change. So I did. Miraculously, I was able to show and explain things which I wasn't able to when I was in a classroom.

Q: Has this current situation brought some positive change in your life as a teacher?

Yes, I have become more computer savvy.

Q: Is there any change you wish to bring in the present teaching system? If yes, then what?

There is a need for updating the information. Make it more activity-based. It has to be cohesive with the present day life situations. There is a dire need for both academic and vocational skills going hand in hand.

Q: Lastly, would you like to share a message to all your students?

There is nothing as impossible in this world. There is no one else like you. You are unique. So cherish your uniqueness and realise your potential. I recall the quote of Swami Vivekanand which still inspires me today, "All the powers in the universe are already ours. It is we who put our hands before our eyes and cry that it is dark..."

As told to Noyonika Dev Sharma, Class X, Apeejay School, Nerul

Express YOURSELF

2020, THE YEAR THAT WAS

2020 has been a tough year for all. We couldn't meet our friends for the "AFTER EXAM PARTY" nor could we go to any restaurant. Some of us followed the strict lockdown in order to get rid of COVID-19. Today I will count 3 ways we're glad to get rid of 2020

■ At the begging of the year, we promised ourselves to follow the ultimate yoga workout and the healthy diet. But ultimately none of us actually followed them. So in 2021 we all look forward to religiously follow our healthy plans.

■ It's been 10 months we've had our homemade food. So obviously we lost 5-

7kgs. But most of us due to WFH (Work from Home) are just wandering from the sofa to the table and the table to the bed-

room. In 2021 we look up to eat at restaurants also to get rid of the addiction to YouTube.

■ Of course! We all had made plans to travel abroad and village. But the pandemic forced us to shut our doors. We all have now been using this peculiar word "WHEN IT ENDS". But deep down we all know this will at least take a year or two. So, in this year we hope to travel around the globe taking all the precautionary measures!

Shreya Maniar, class IX, Universal High, Malad

HELLO, 2021

2021 is just hours away, and the key to making a year pleasant and joyful is to welcome it with happiness. So, here are some ways to usher in an exciting 2021.

Rewind

Buy a scrapbook or use papers to write down and add pictures (even better!) of your little memorable moments of 2020. Then take a few minutes to read, recollect, enjoy and preserve those memories.

Spend time with your family, do something off routine

You can turn your day into a movie night, call it a holiday from work, turn off gadgets and spend the whole day chatting with family or cook for your parents for a change. There is no harm in cancelling technology

and work from one day of your life, is there?

Write down your goals for 2021

Be planned to face 2021 in every way, and write down everything you need to do to face any upcoming challenges in 2021. This way you can have a well-planned, organised new year!

It's a fresh start!

Be sure that all work you have this year doesn't get carried forward to the next and melt all that workload and homework. 2021 is a fresh start, and keep your mind and to-do list calm, free and clear.

Kritisha Babu, Class VIII, Lokpuram Public School

Written in December 2020

PORTAL

Mystical portals were portals, an enchanting dream. How would it be like to step in shimmering glass and enter an oceanic world? Full of faeries and Dragons, Kingdoms and Conquests, Gods and Titans, Angels and Demons, Love and Betrayal, Utopia and Dystopias, Hope and Magic. Then one fine day, I sat on the floor and wandered and got lost In the majestic world Of ink and paper I had found my portal better than the wildest of My best dreams. That day someone smiled basking in the light of knowing that there is an after-life too.

Virtual Annual Day

ANUSHREE MEHTA, CLASS XI, APEEJAY SCHOOL, NERUL

Apeejay School Nerul's Annual Appreciation day is an occasion of delight where students not only present their wonderful performances but also receive honors for their curricular and co-curricular achievements. This year's annual day was particularly special because it was hosted virtually on 19th December.

Bipin Kumar Singh, IPS, commissioner of police, Navi Mumbai graced the occasion as the chief guest and N N Nayyar, Senior Education Officer of Apeejay Education Society was the guest of honor.

Just like all auspicious occasions, the proceedings of the evening were also commenced with the lighting of the lamp. This was followed by the invocation dance dedicated to Lord Ganesha, performed by students of the primary section who infused the arena with sanctity.

The vice principal, Namita Anand extended a warm welcome to all the dignitaries. She presented the annual report highlighting the feats achieved by the school during the year.

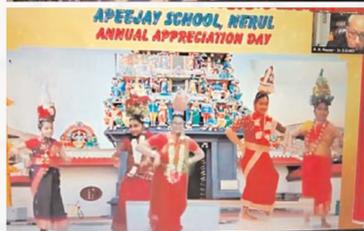

This was followed by a motivating address by the guest of N N Nayyar, Senior Education Officer of Apeejay Education Society. He applauded Apeejay School, Nerul being the path finder and continue in the path of excellence.

The prize distribution filled the heart of every achiever with pride as their hard earned accomplishments were recognized and felicitated.

The theme of the celebration was 'Revival' which was an effort to revive the lost culture and heritage of our country. Dance is a legacy that has been handed down from generation to generation. It is a precious heritage that must be conserved. The program 'Revival' was an attempt to resurrect some of the lesser known dance forms that are not prominent but equally enriching. The elegant dancers of the secondary section brought forth breathtaking performance of four lesser known forms of dance from four corners of the country: Chhau of Jharkhand, Karagattam of Tamil Nadu, Kabilia of Rajasthan and Pahari of Himachal Pradesh.

The chief guest, Bipin Kumar Singh, in his speech stressed on inculcating moral values and patriotic values. As a Commissioner of Police he asked one and all including students to help make Navi Mumbai free of substance abuse and cybercrime. He expressed his own teachers too to shape him the man as he is today.

The school orchestra was a treat for the

ears. Sounds of different instruments came together to create a magical symphony. The program concluded with a vote of thanks and rendition of National Anthem.

CHRISTMAS CELEBRATION

R. N. Sheth Vidyamandir, Andheri East

One thing was sure that Christmas in 2020 would be different. It would be on a smaller scale but the enthusiasm would soar more than ever. Soaking in the spirits of Christmas, students of Smt. R. N. Sheth Vidyamandir celebrated the festival on the eve of Christmas i.e. 24th December.

The significance of the festival was explained through a small information on Christmas and a short animated movie on Santa Claus.

Teachers sang Christmas carols and hymns. Principals of both the sections motivated the spirits of students through inspiring speeches and best wishes.

The celebration ended with dance tuned on the song of Jingle bells. The boundless joy of celebrating the festival was visible on the faces of all the children.

New Horizon Public School, Airoli

New Horizon Public School, Airoli celebrated Christmas online in all classes. Children presented tableaux, sang traditional carols and decorated Christmas Tree. The tableau depicted the significance of Christmas and story of birth of Jesus Christ. Singing of melodious Christmas Carols brought cheer among the children. Christmas brings optimism and happiness among children. Children in all classes spread the message of love and joy to all.

IS PUJARA'S POOR STRIKE RATE A CONCERN FOR TEAM INDIA?

Cheteshwar Pujara was the batting mainstay when the two sides locked horns Down Under in 2018-19, but in the ongoing series, the right-handed batsman has been struggling against Australia's pace battery. Pujara has been dismissed four times by Cummins. Former Australia captain Ricky Ponting even went on to say that Pujara's slow batting created an unwanted pressure on the non-striker who had to compensate for his slow approach. But, is the criticism justified?

PUJARA WAS SCARED TO PLAY SHOT, PLAYED TO SURVIVE

He (Pujara) is almost scared to play a shot, isn't he? He is playing to survive rather than looking to score. He's not had quite the same impact this series in that he's taken so long to score his runs, it's like he's stagnated at the crease and it has had a bit of a ripple effect through the Indian batting. They can't seem to get on top of Australia's bowling.

Credit where credit is due, the bowling has been very good and Australia haven't allowed them to get away. That's half the battle as well, the guy's been hard to get out but if the scoreboard is not moving, eventually you get your rewards.

Allan Border, former Australia skipper

UNFAIR TO ASK HIM TO PLAY AGGRESSIVE CRICKET

I don't think Pujara is the culprit in this case at all. Generally in his career he has played his brand of cricket and it would be unfair for the team to be asking him to be playing something which is totally out of his natural style.

I will put it down to Rahane and Vihari, who came in and scored 4 off 38 balls (in the first innings). To me, both players need to get the game moving, understanding the role that Pujara has done not only in this series but every other series that he has played Test cricket in for India.

Tom Moody, former Australian all-rounder

PUJARA CAN HURT TEAMS EVEN WITH A LOW STRIKE RATE

As you know Australians love to drink coffee, and we have decided to go on a little campaign to make sure we have plenty of caffeine when it comes to watching Pujara bat. But, you know what the reality is, he hurt us badly (in 2018-19).

We are of a generation now where we are admiring people for their strike play, we are admiring people for their strike rate. Well, he is one of the few guys in Test cricket that have a strike rate of sub 45 and he can hurt you.

Matthew Hayden, former Australia opener

Pujara made his slowest fifty in Test cricket before being dismissed for 50 off 176 balls, a strike-rate of 28.41 in the first innings

THAT IS HOW HE PLAYS AND IT'S EFFECTIVE

That is how he plays. We won the series (2018-19) with Pujara scoring three hundreds. So, we can't accuse him of playing slowly because that is his way of batting. You cannot accuse him of not winning matches for India, because he has done that in the past. Both in Australia and on the sub-continent wickets.

Sanjay Jagdale, former BCCI selector

Indian cricketers subjected to abuse again

Mohammed Siraj complained of racial abuse from the crowd

Cricket Australia said it condemned "in the strongest terms possible all discriminatory behaviour" after sections of the crowd in Sydney allegedly racially abused Jasprit Bumrah and Mohammed Siraj

Team India lodged an official complaint with the match officials at the end of Day 3's play in Sydney. To the shock of many the vile behaviour of the fans continued on Sunday, Day 4 of the Sydney Test as Siraj was targeted once again while fielding at the boundary rope. The play had to be halted for ten minutes after Siraj alerted his teammates and captain Ajinkya Rahane took up the matter

with the on-field umpires.

The umpires then had a chat with security officials at the ground, following which six Australian supporters were asked to leave after being identified as the perpetrators. Reacting to the racial abuse of the visiting players, Cricket Australia said it condemned the behaviour of the fans, who will be banned from the SCG once found guilty.

THERE IS NO PLACE FOR THIS RUBBISH

Tum karo toh Sacasm, aur koi Kare toh Racism. Very unfortunate with what some of the Australian crowd has been doing at the SCG and spoiling the vibes of a good test series. Virender Sehwag

I personally have heard many things on the field while playing in Australia about Me, My religion, My colour and much more. This isn't the first time the crowd is doing this nonsense...

How do u stop them?? Harbhajan Singh

Very unfortunate to see what's happening at SCG. There is no place for this rubbish. Never understood the need to yell abuse at players on a sporting field. If you're not here to watch the game and can't be respectful, then pls don't come and spoil the atmosphere. VVS Laxman

Unacceptable behaviour there is no place for racism, I hope this is dealt in the most severe way. Tom Moody

I hope the spectators evicted from the SCG today aren't allowed into a ground at anytime. They tarnish our sport and they tarnish the reputation of their society. Harsha Bhogle

Messi revival continues as Barcelona thrash Granada

Some had wondered if Messi would ever get back to his best following an underwhelming start to the season but his latest contribution makes him the league's top scorer on 11 goals

Lionel Messi is back in form and Barcelona are finding their feet after a 4-0 demolition of Granada put them within four points of the top of La Liga. Messi scored twice to make it four goals in three matches since the turn of the year and his resurgence has coincided with an upturn for the team too, this victory is Barca's third on the bounce. It puts them in sight of league leaders Atletico Madrid, even if Diego Simeone's side now have three games in hand. AFP

QUIZ TIME!
